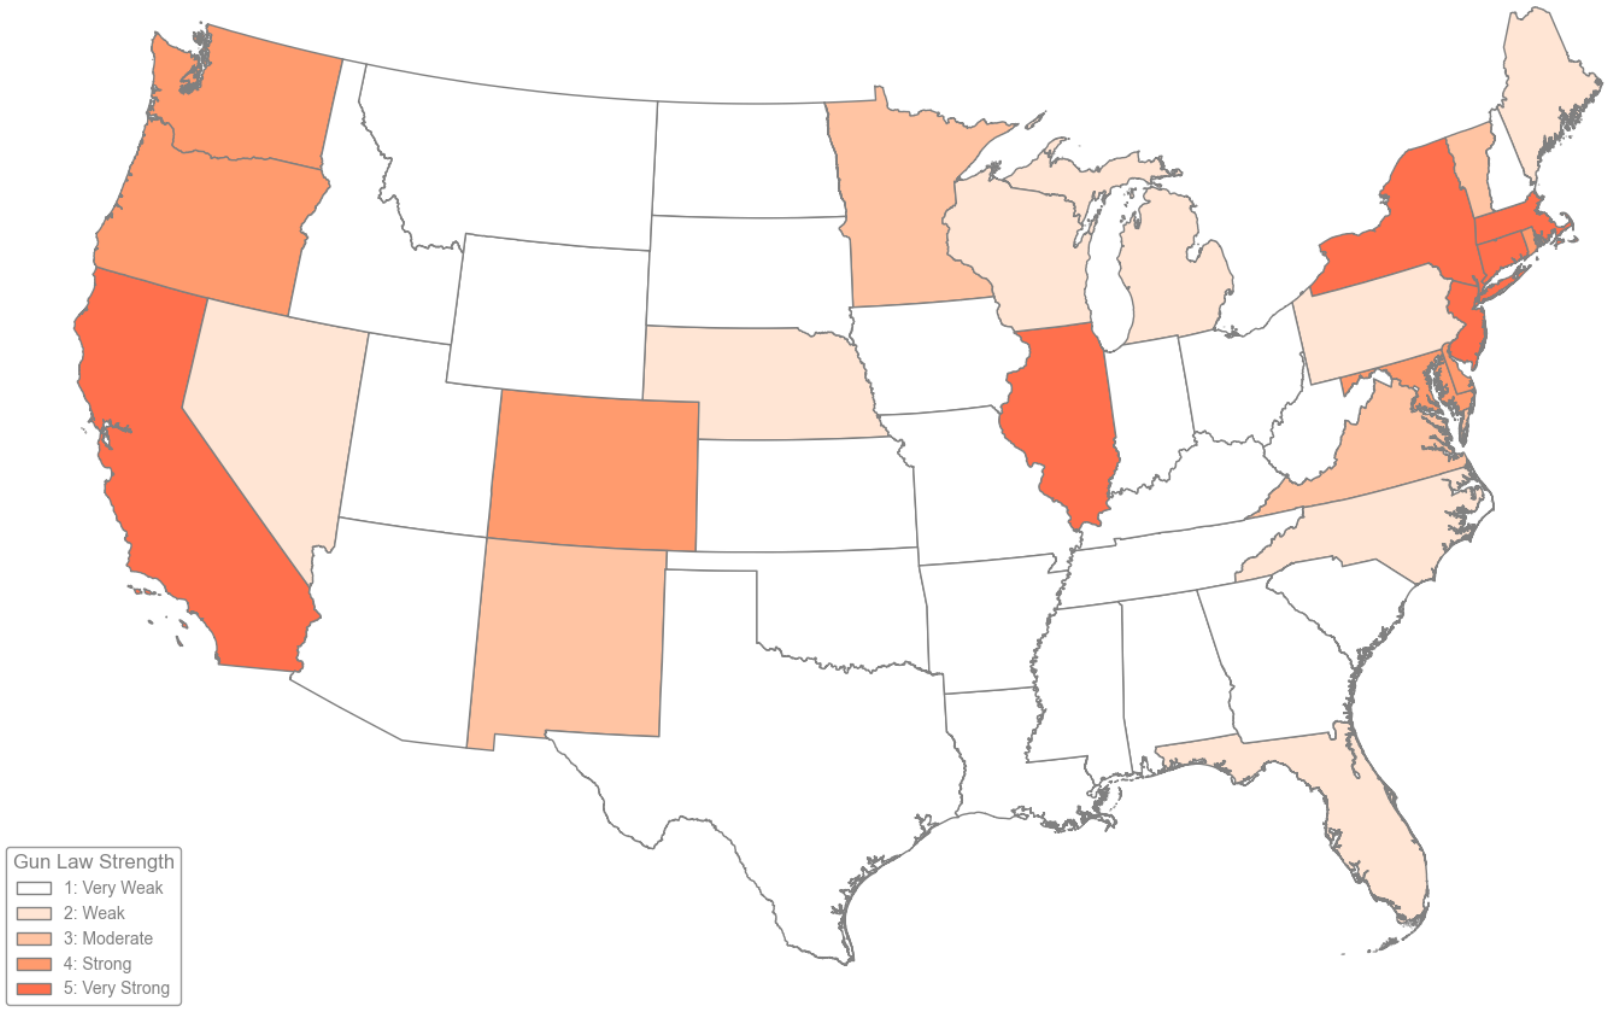
Story 3

Focus: Chart Selection

Gun law strength

Every state has different laws to control firearms.

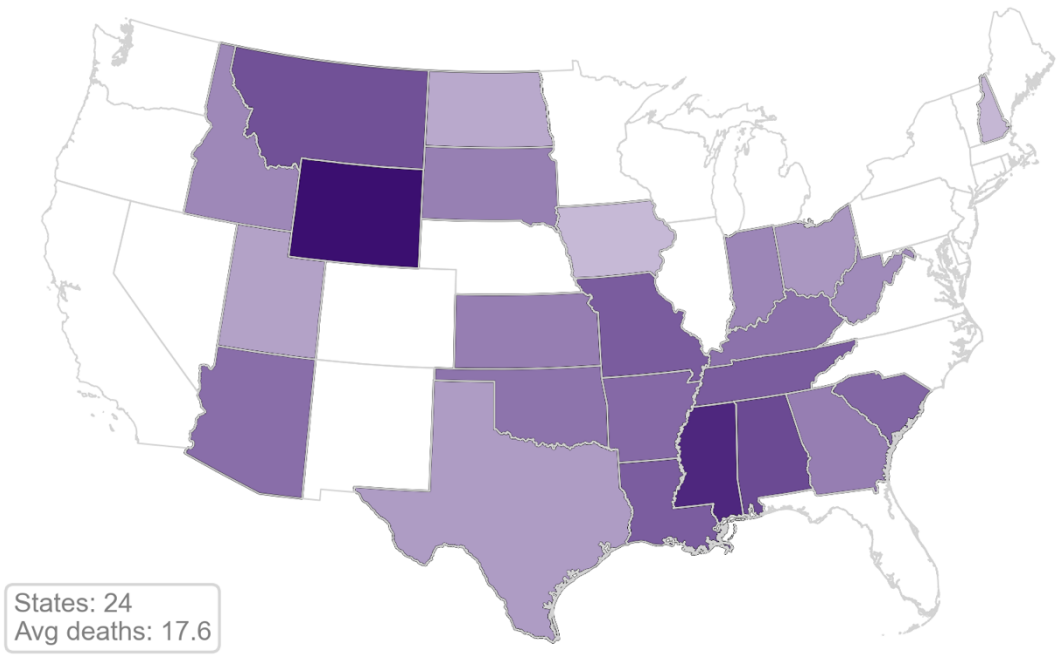
Do differences in the strength of gun laws affect firearm deaths in US states?

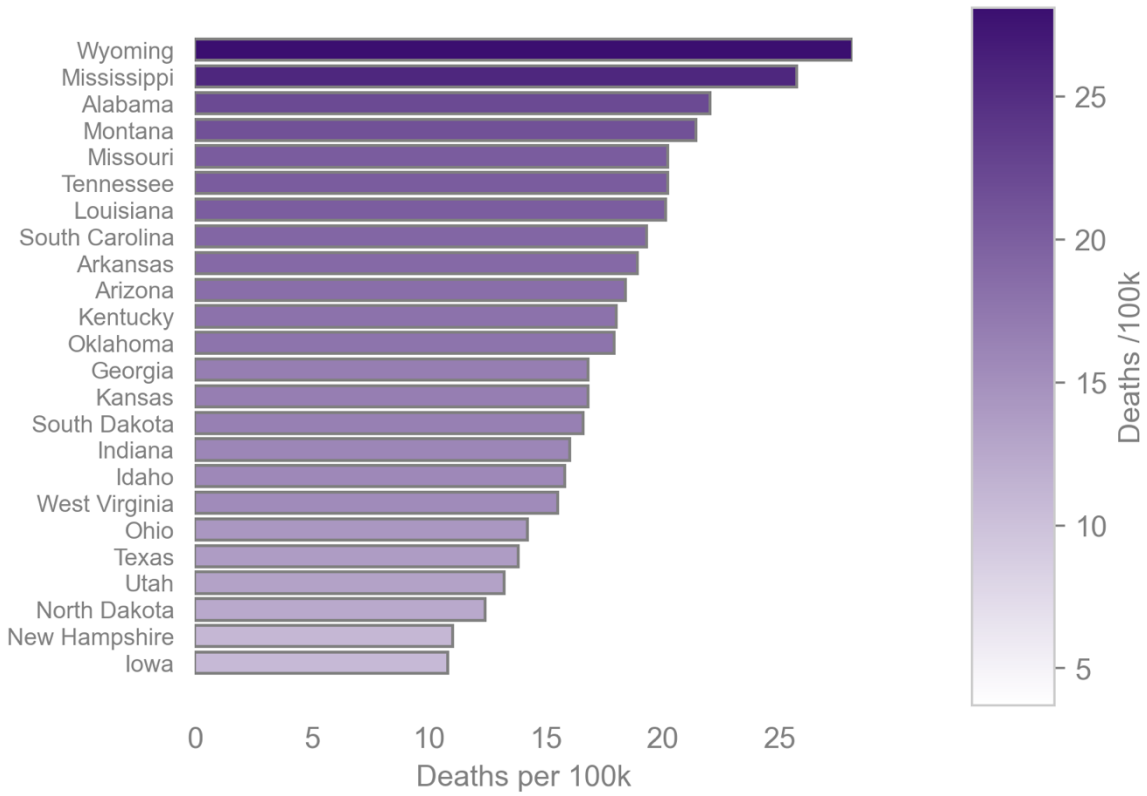


Very weak gun laws

States with **very weak** gun laws average **17.6 firearm deaths per 100k people** and **a high of more than 25 firearm death per 100k people**.

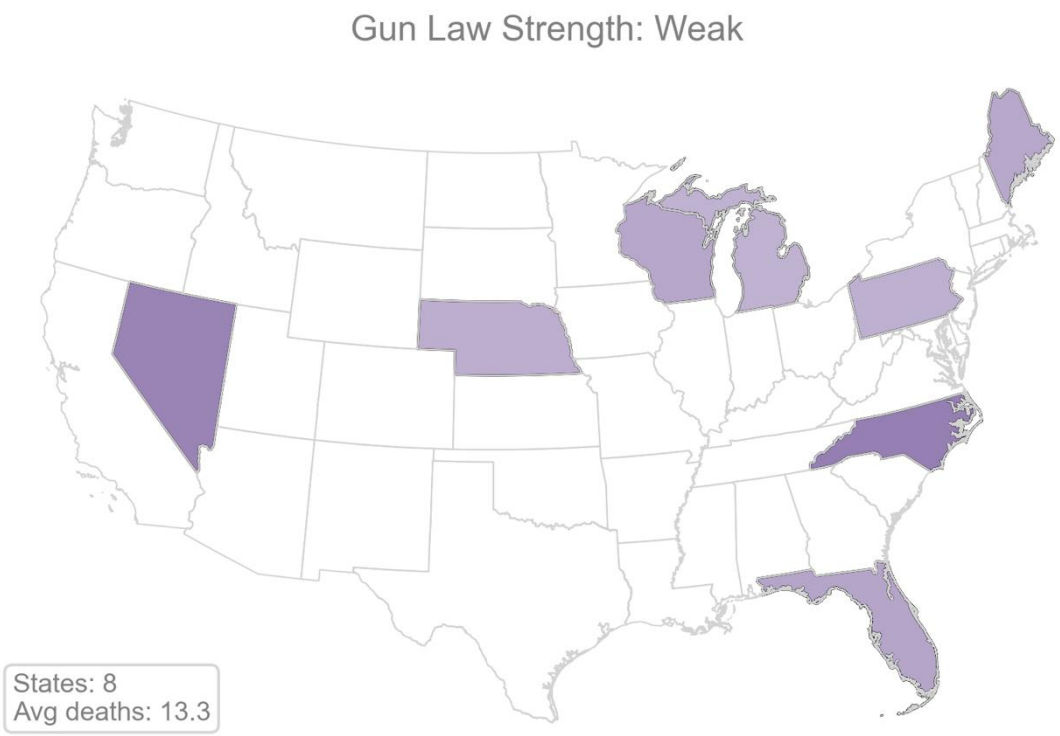
Gun Law Strength: Very Weak

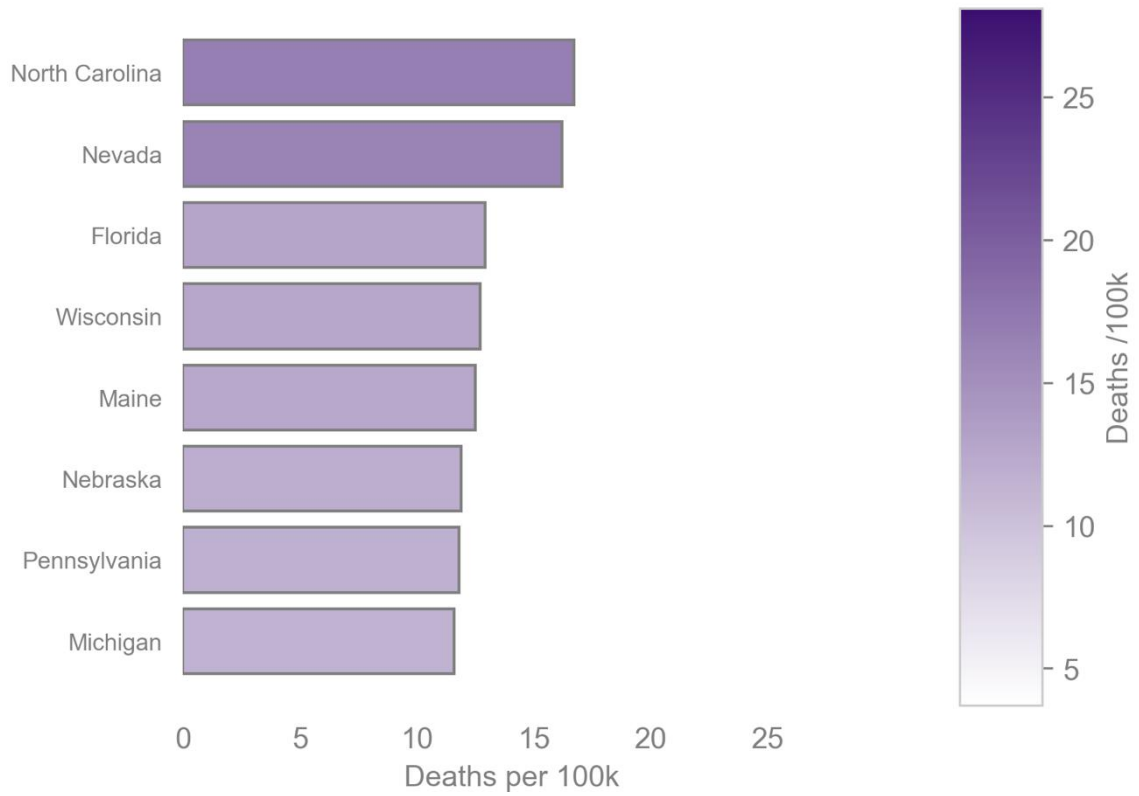




Weak gun laws

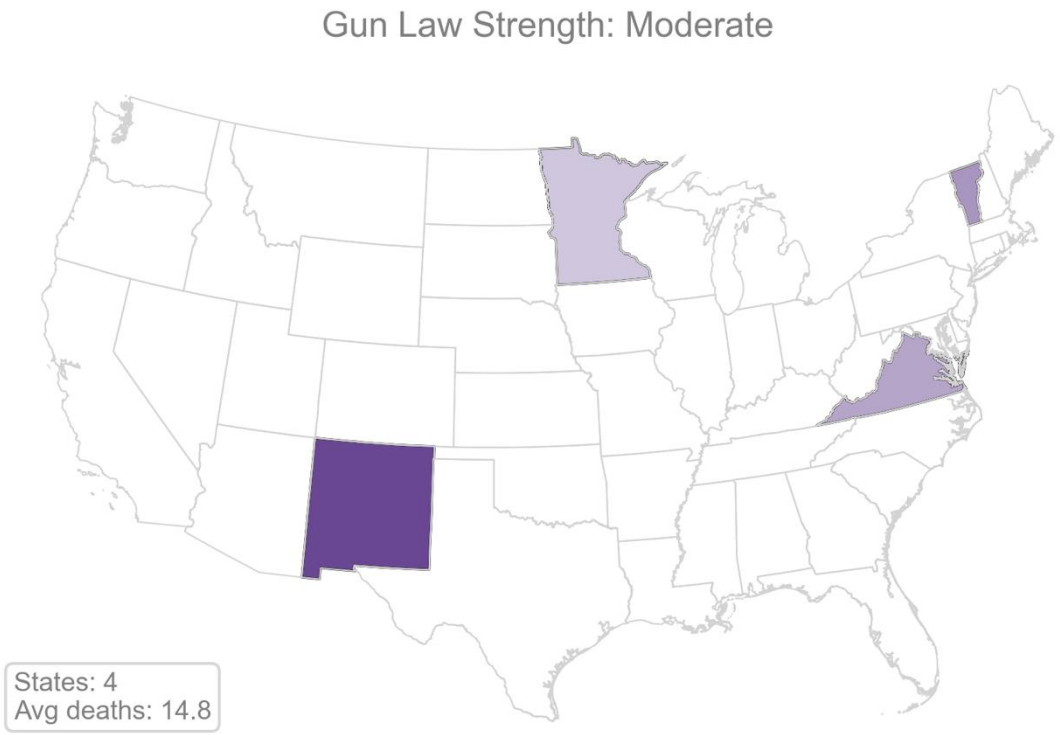
States with **weak** gun laws average **13.3 firearm deaths per 100k people** .

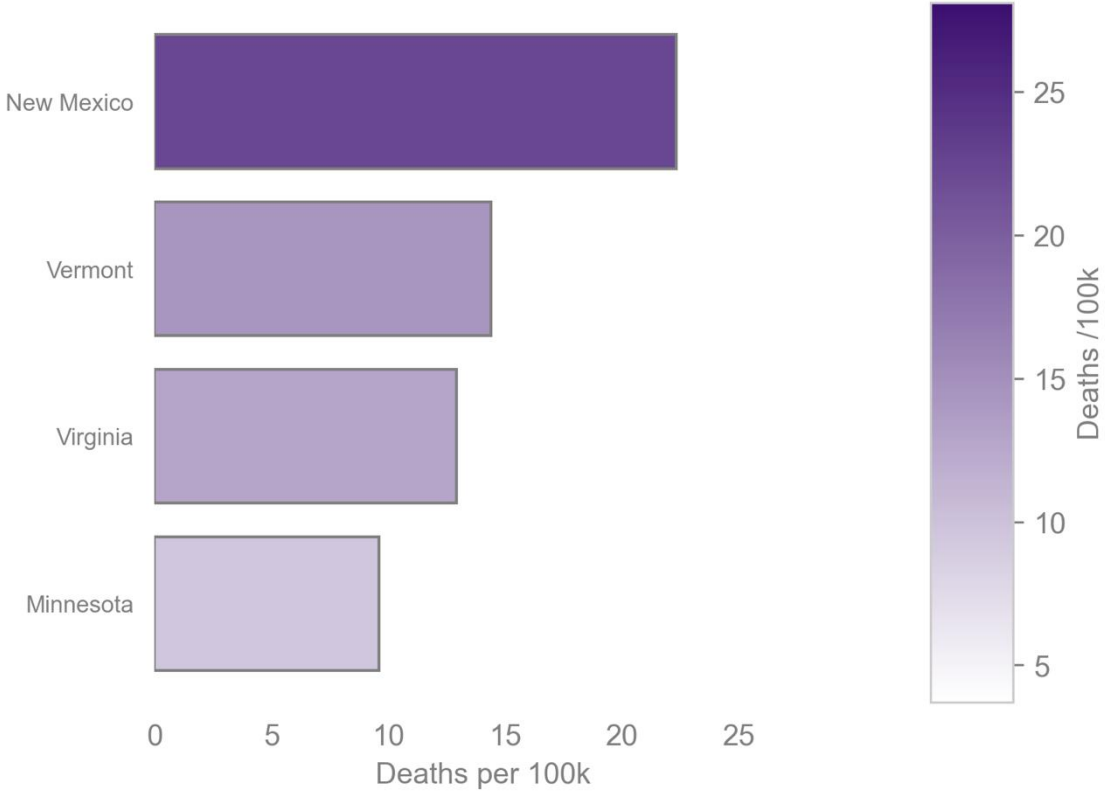




Moderate gun laws

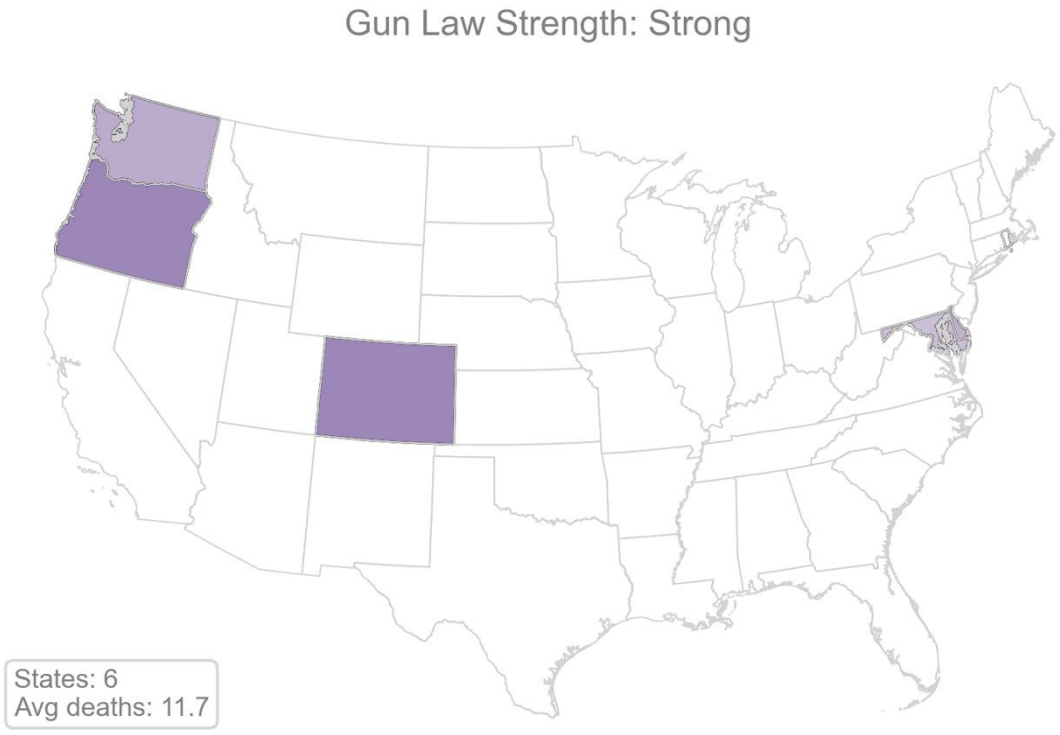
States with **moderate** gun laws average **14.8 firearm deaths per 100k people** .

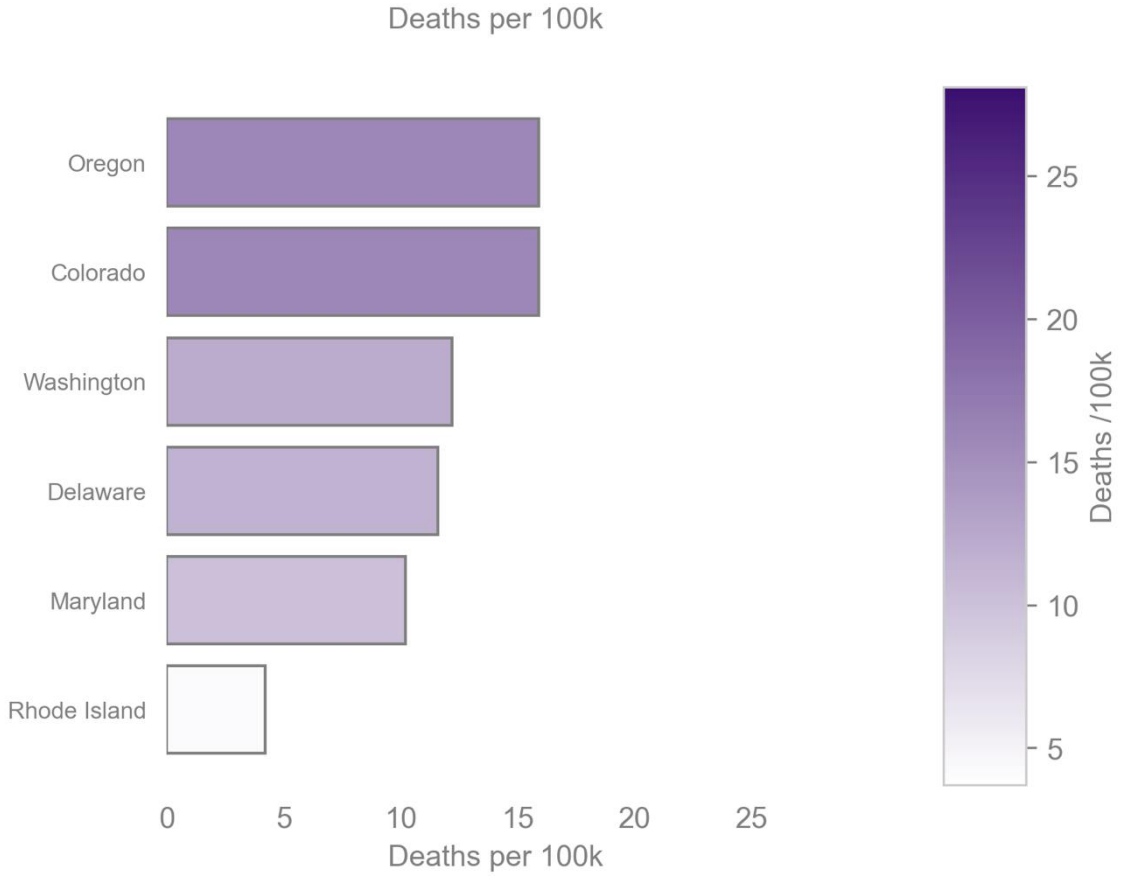




Strong gun laws

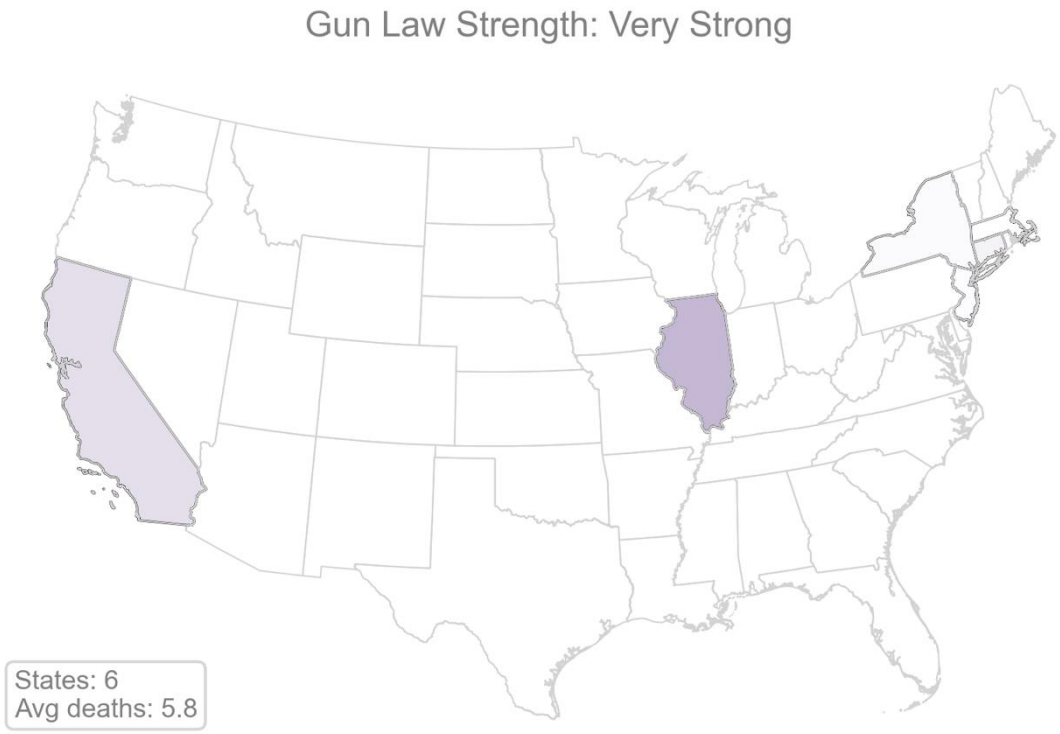
States with **strong** gun laws average **11.7 firearm deaths per 100k people** .

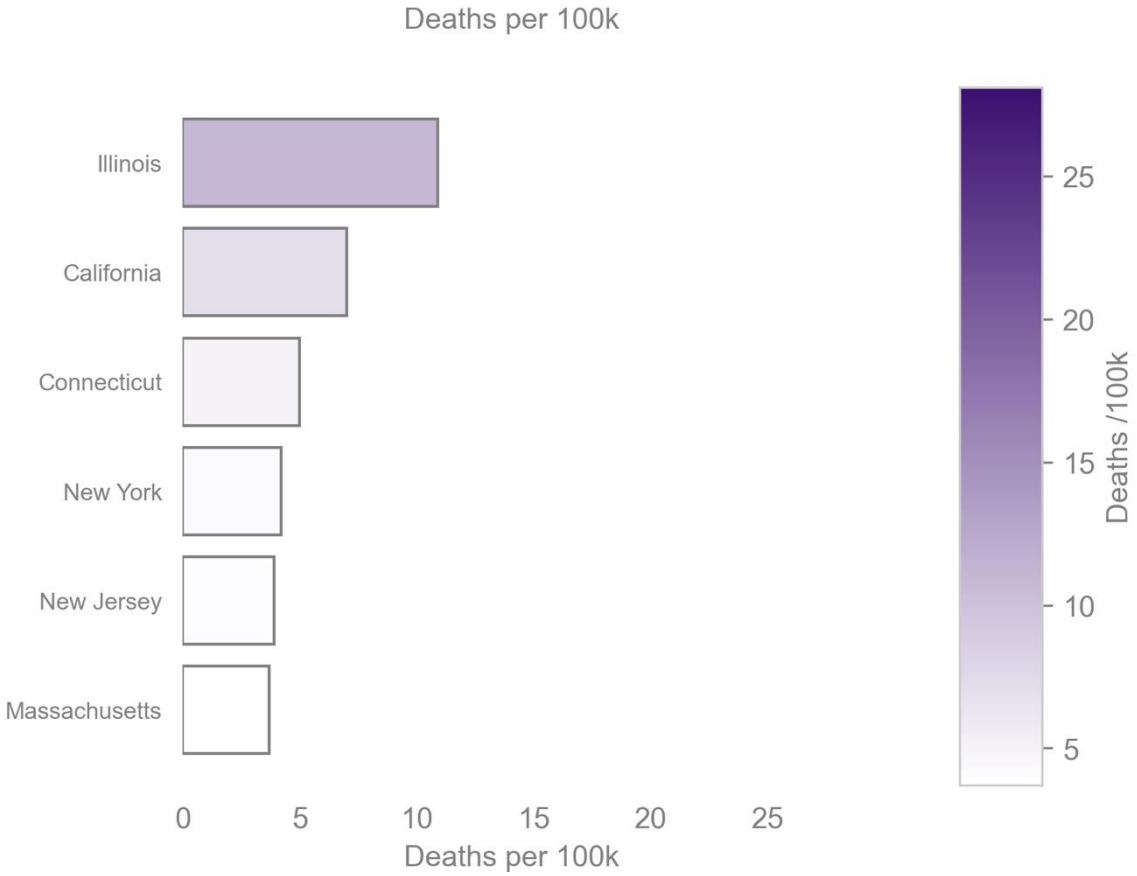




Very strong gun laws

States with **very strong** gun laws average **5.8 firearm deaths per 100k people** .





Correlation: Gun Laws & Firearm Deaths

There is a strong negative correlation between an increase in the strength of firearm laws and a decrease in firearm deaths. In other words:

When laws get stronger, firearm deaths decrease.
