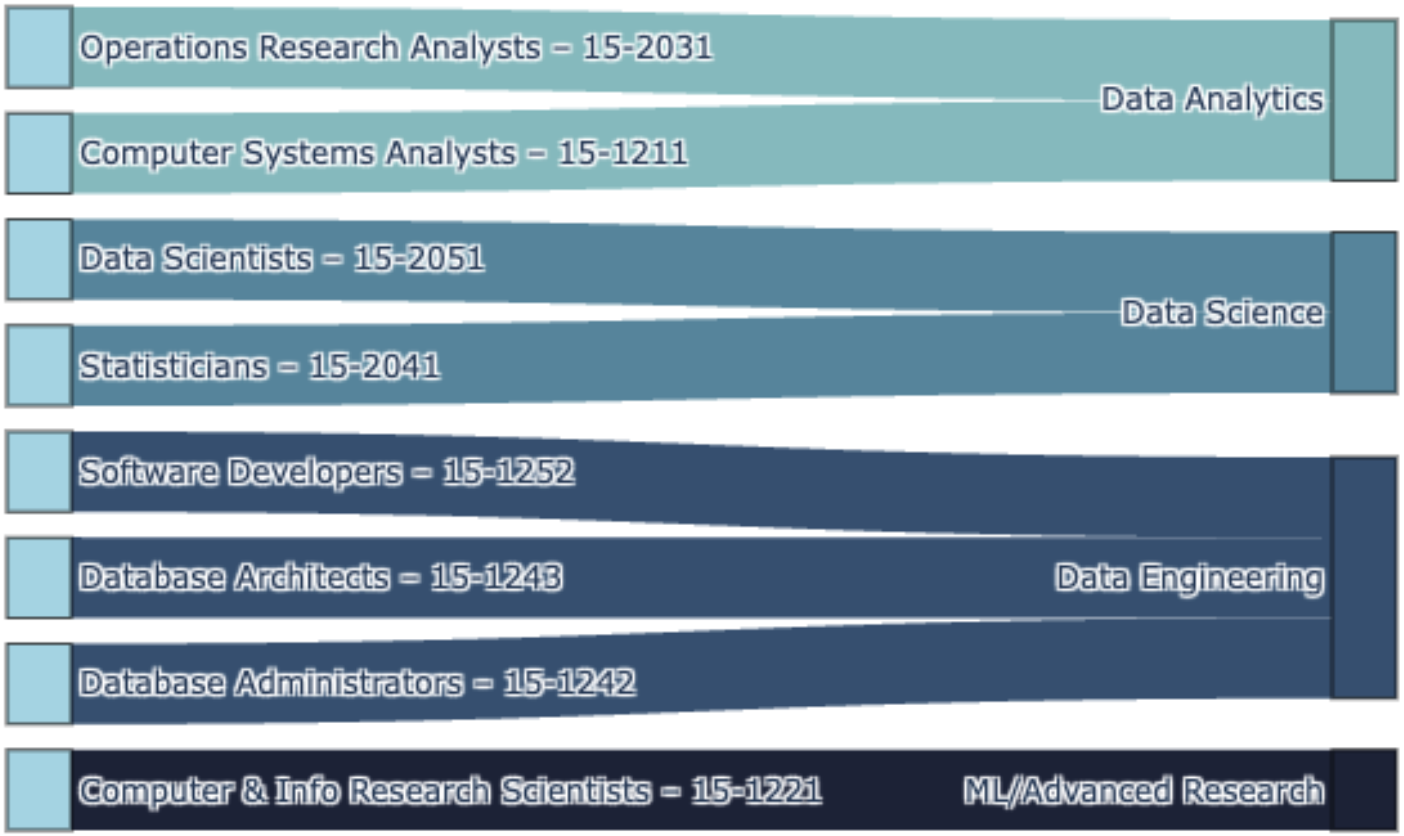
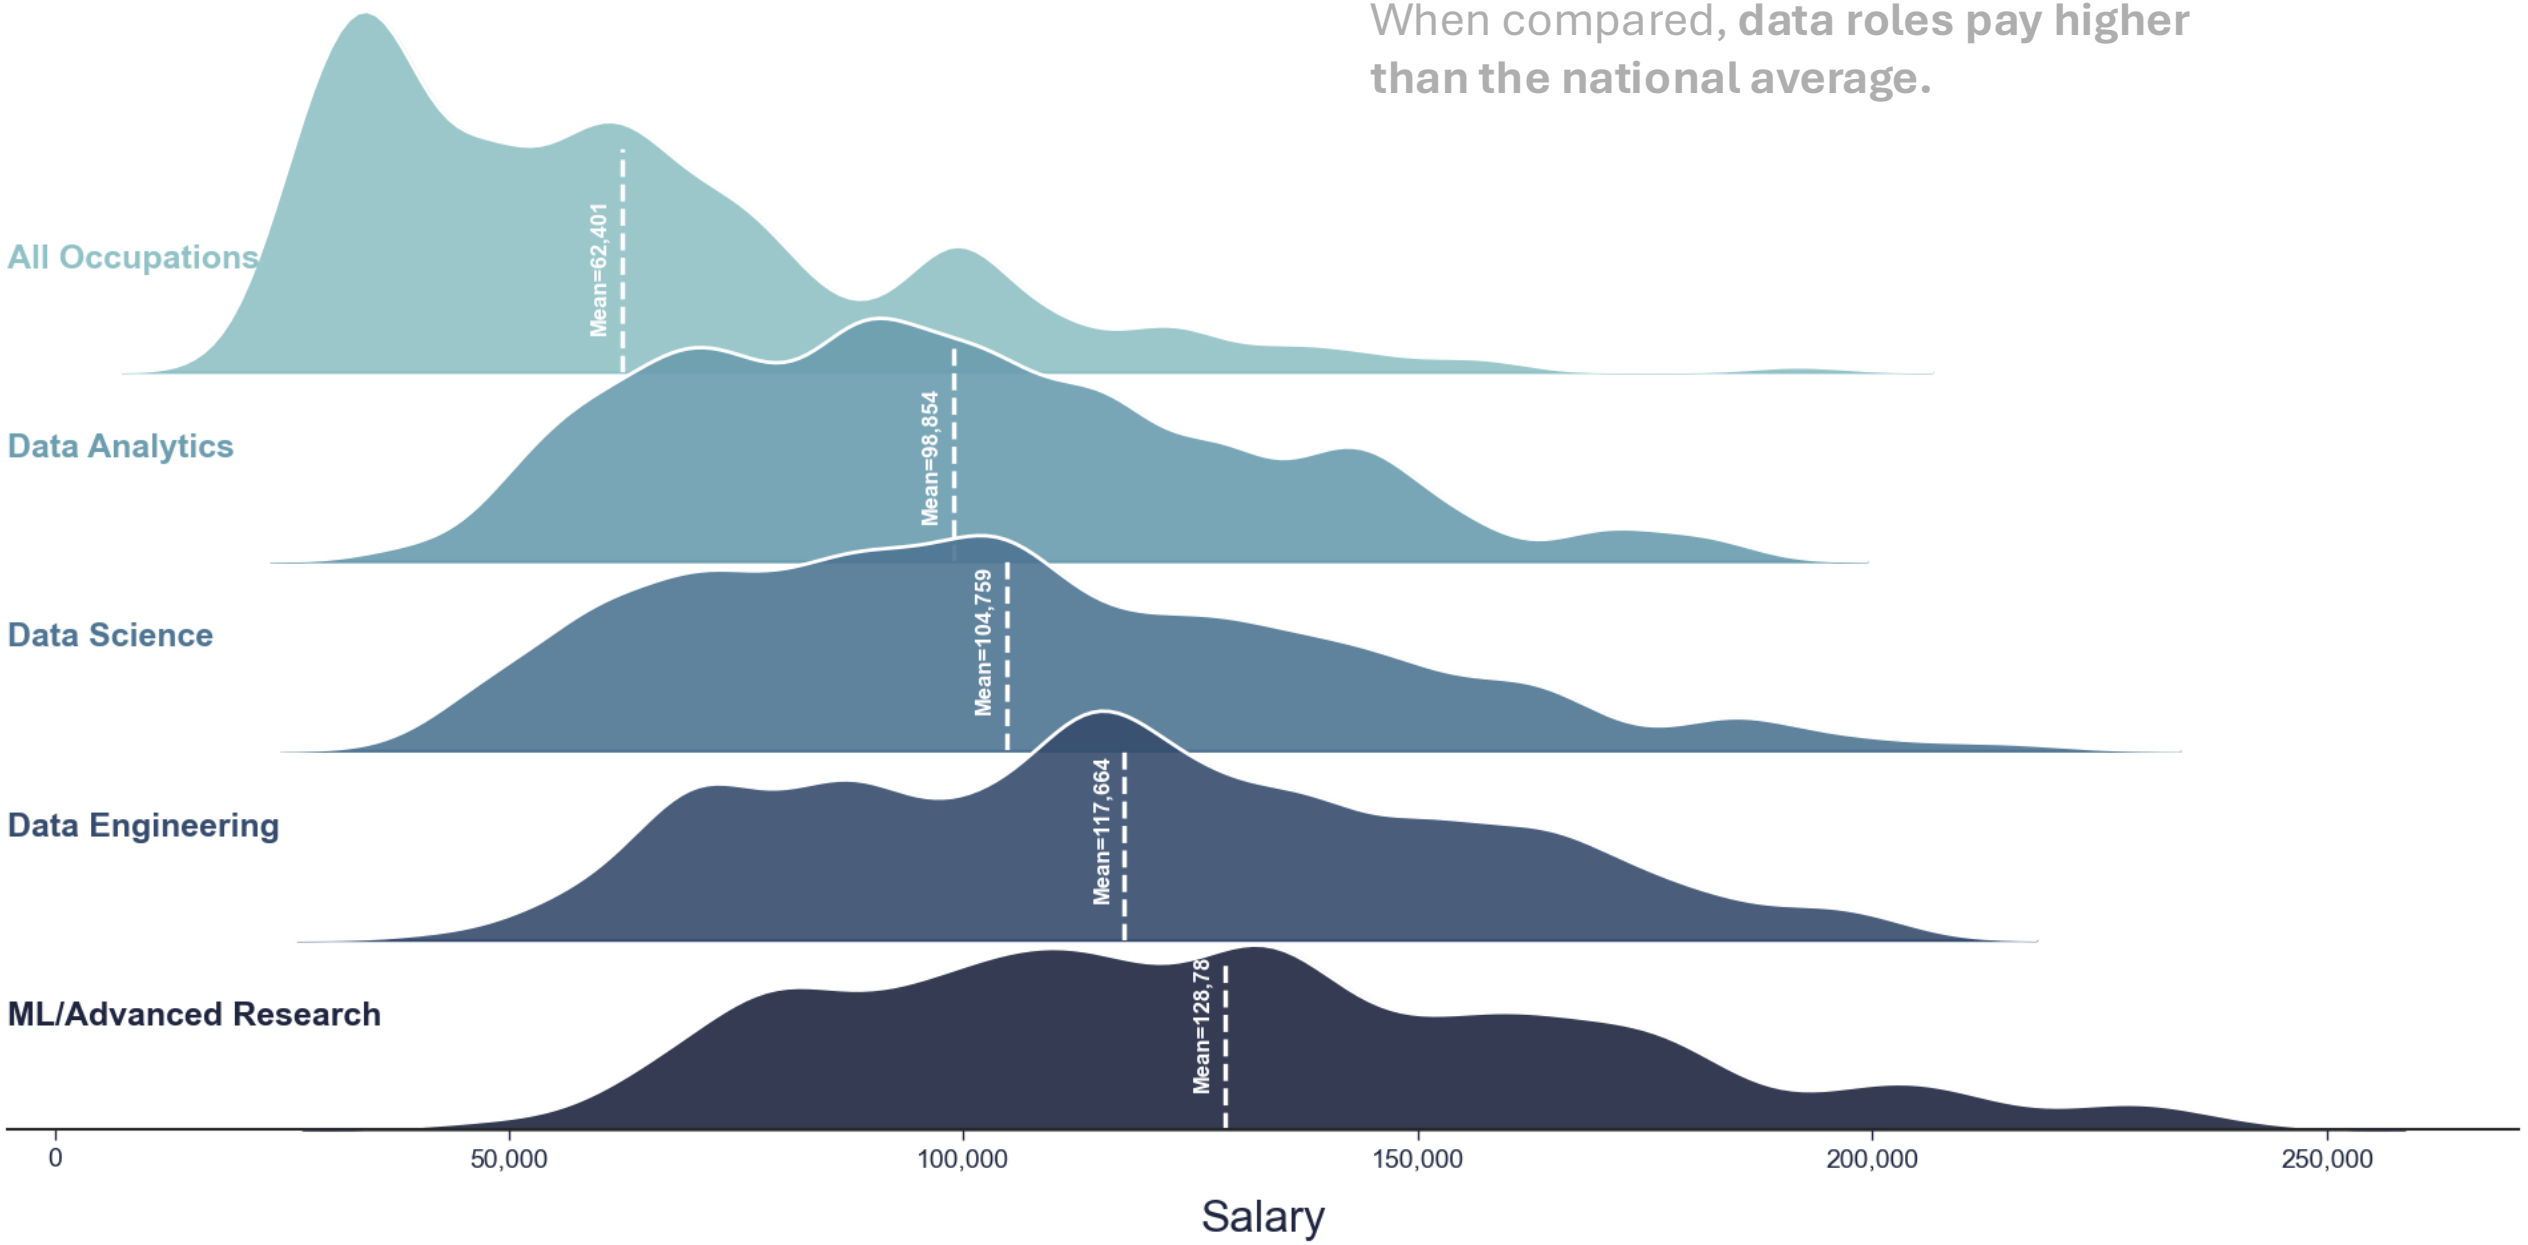
What do data jobs pay when compared to the national average pay?

Job Titles → SOC Codes → Data Roles

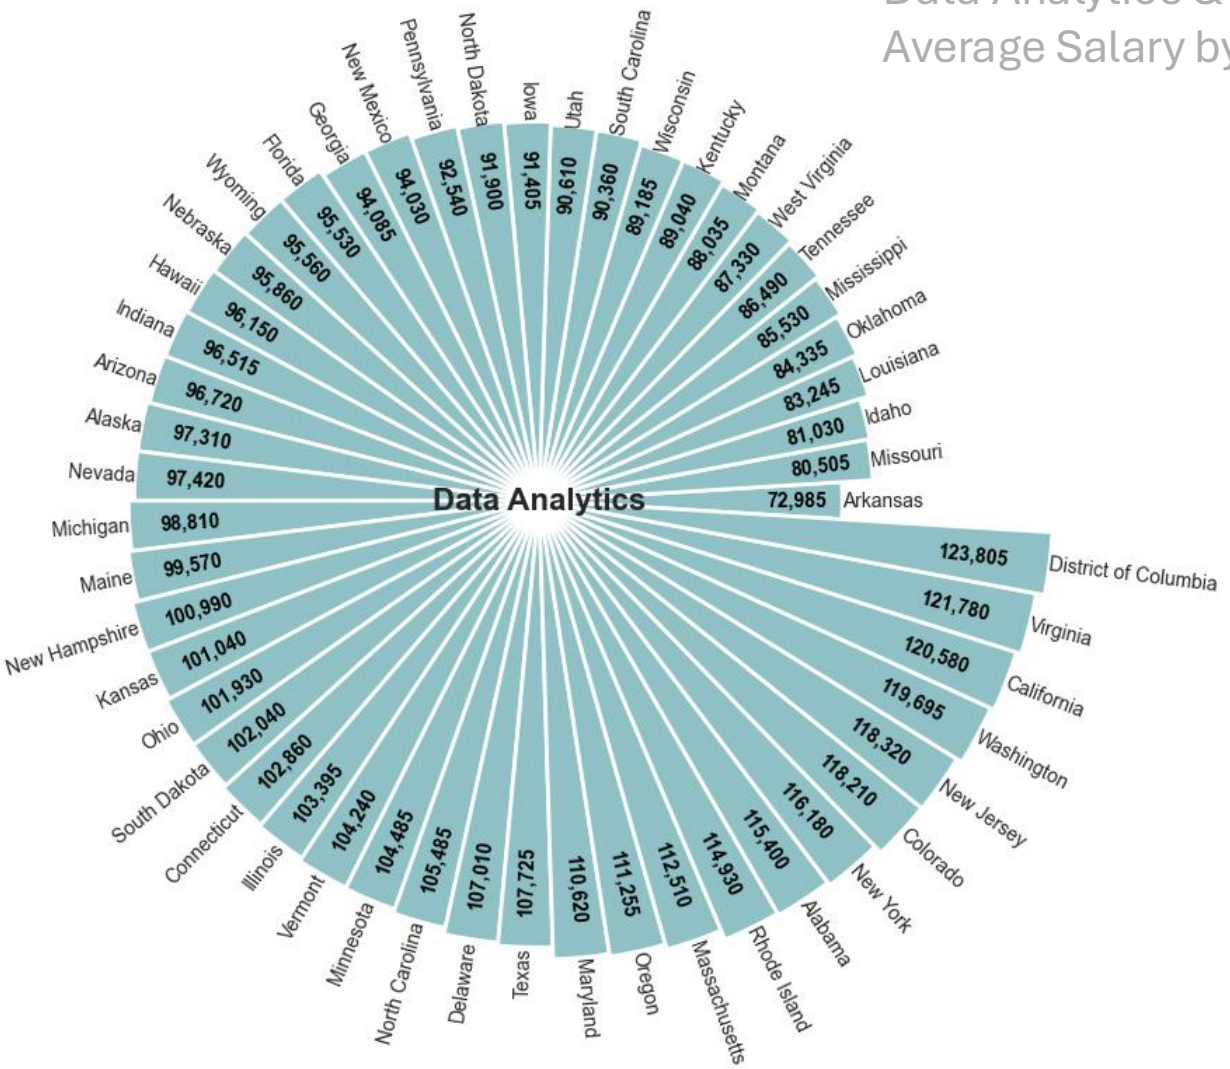
To analyze wages, SOC codes were collected from the Bureau of Labor Statistics and assigned **to four data related job categories: Data Analytics, Data Science, Data Engineering, and Machine Learning/Advanced Research.**

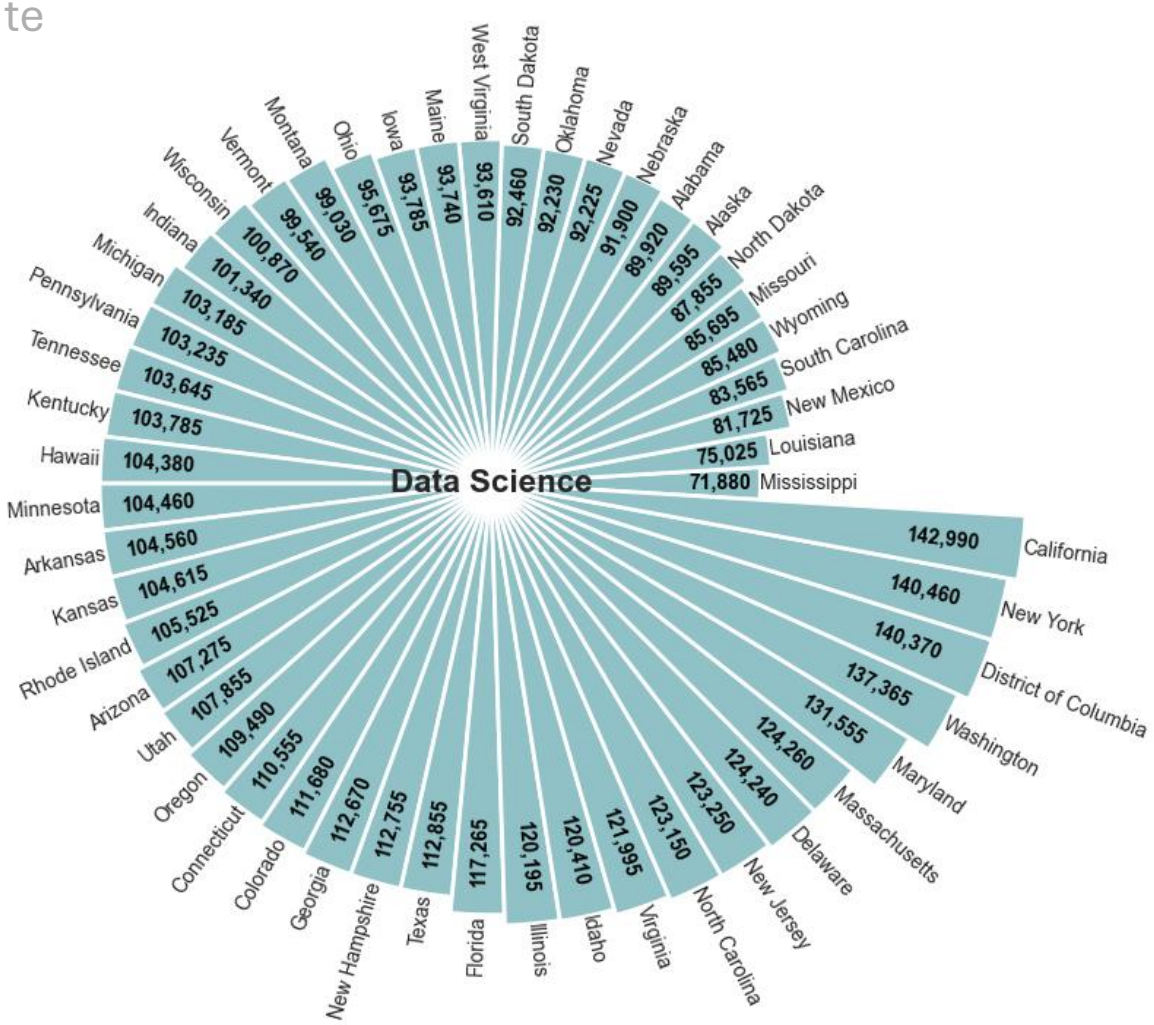


When compared, **data roles pay higher than the national average.**



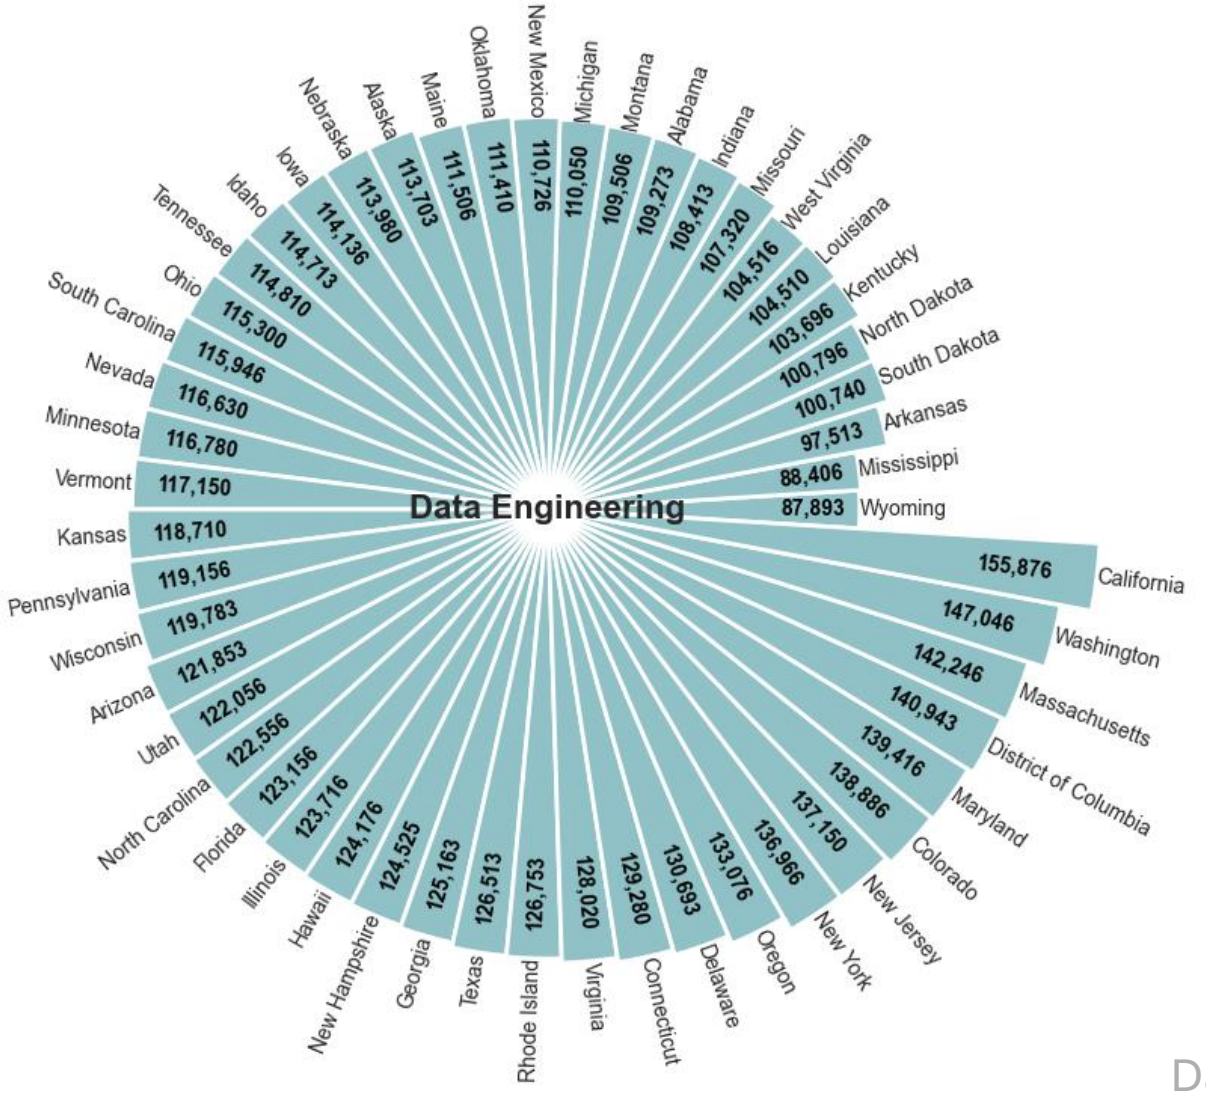
Data Analytics & Data Science: Average Salary by State

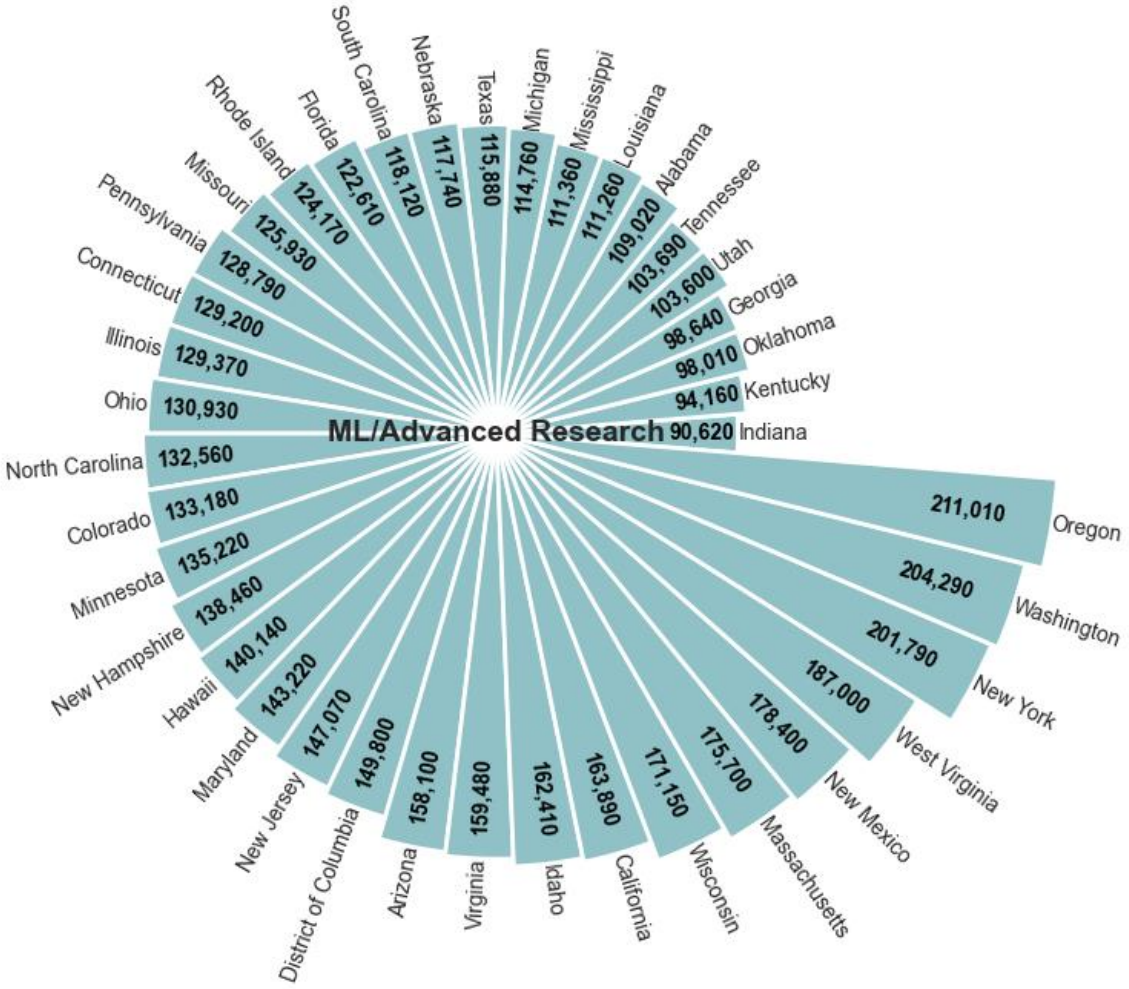


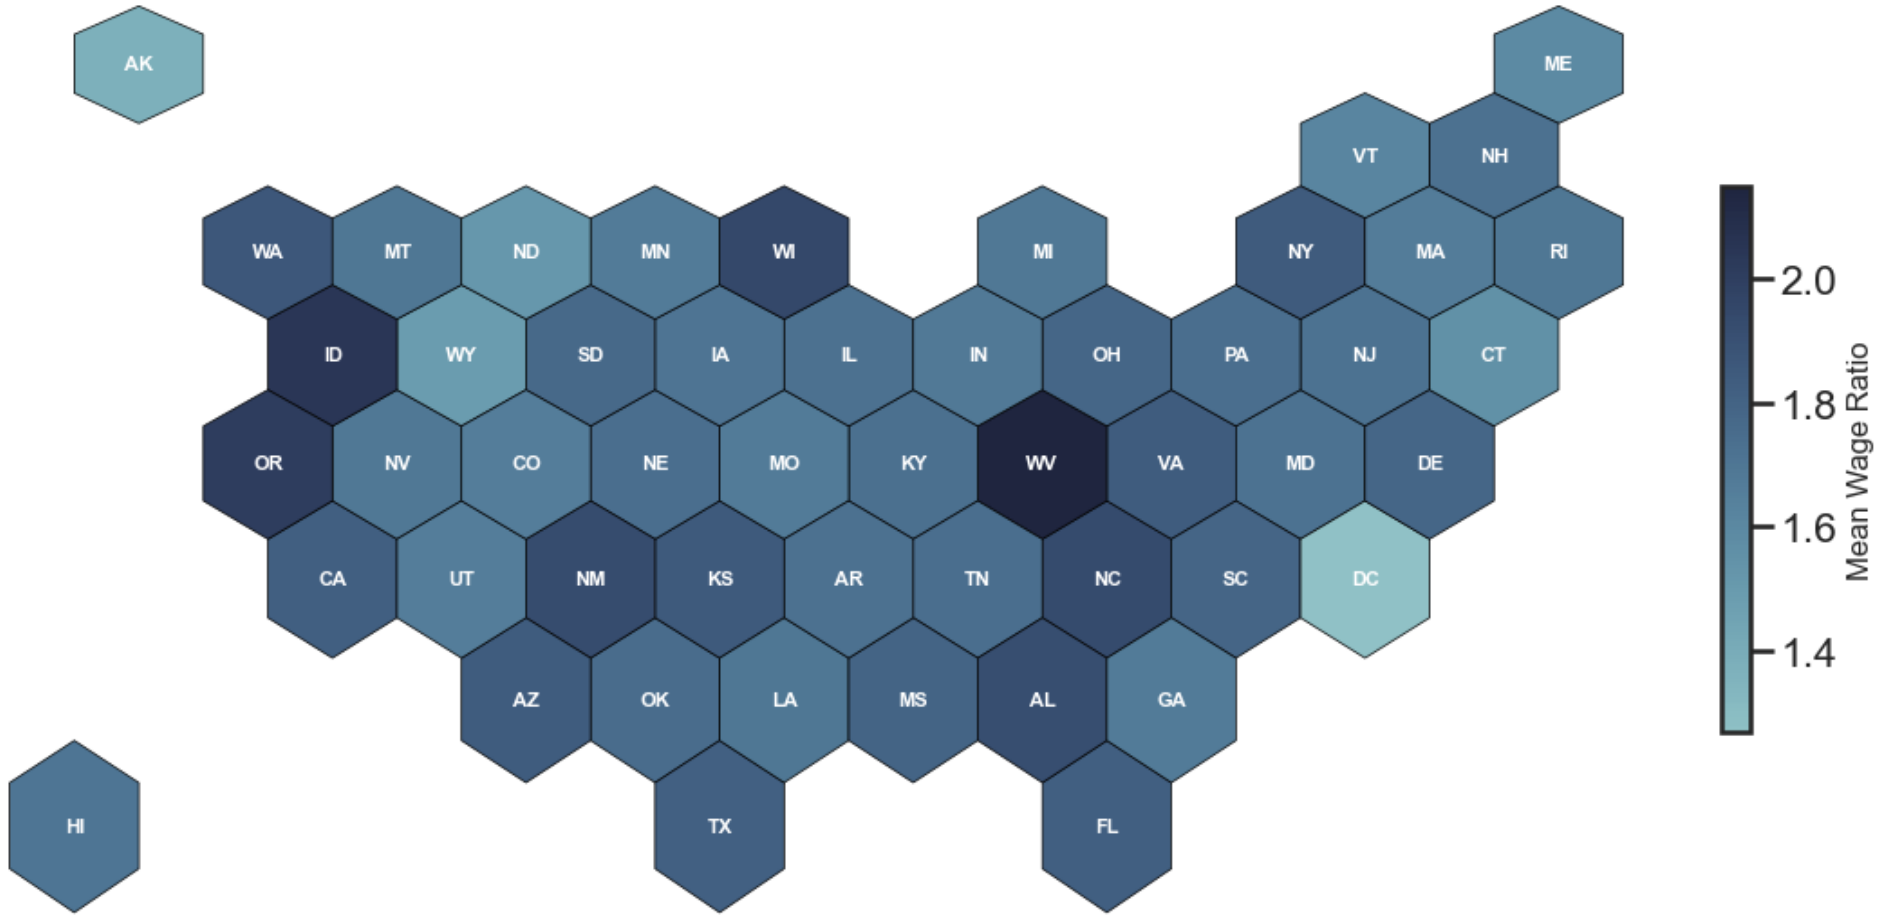


Data Analytics and Data Science have **a range of $50,000 and $70,000 each from the lowest paying to the highest paying state**, on average.

Data Engineering & ML/Advanced Research: Average Salary by State





Data Engineering and ML/Advanced Research have **a range of $70,000 and $120,000 each from the lowest paying to the highest paying state**, on average.


In all states, **the data practitioner's average salary is higher than the state's average salary**
